

## SOII (Satellite Operators Interference Initiative)

### Charter & Mission Statement

Dick, the following is the last draft of the charter wording that we put on paper. This was discussed in Amsterdam and it's likely we will make some changes to put better definition on the requirements for installation by certified installers as it isn't appropriate for some types of self-install VSAT services.

#### **Charter**

- All transmit antenna/equipment installation to be performed by Qualified/Certified Installers
- All transmitting sites to be under 24/7 control
- All transmit antennas to be registered (by Satellite Operator or other agreed entity)
- All Satellite Operators to follow and enforce Universal Access Procedures and associated best practices
- Carrier ID to be adopted as mandatory
- All transmit facilities to be manned by Qualified/Certified Operators

Regards,

Stewart Sanders
