## How Radio Utilizes IP Today, and In The Future

Gino Jensen Galaxy 1

# ISDN

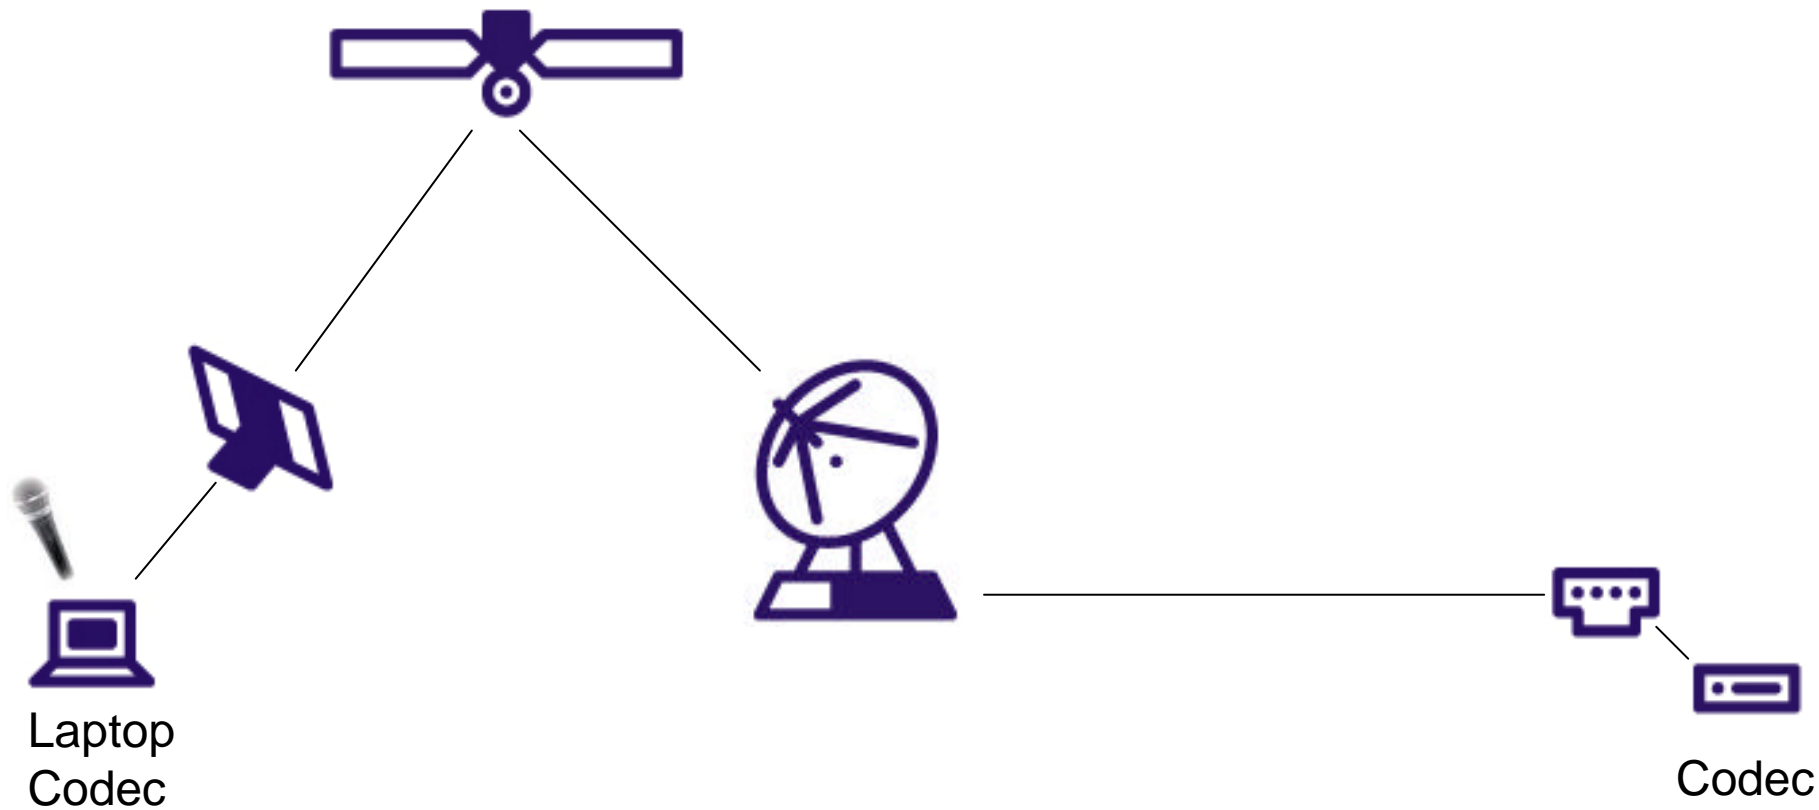

*Sprint plans move to packet-switched network. The company envisions a 30% drop in operating costs.*

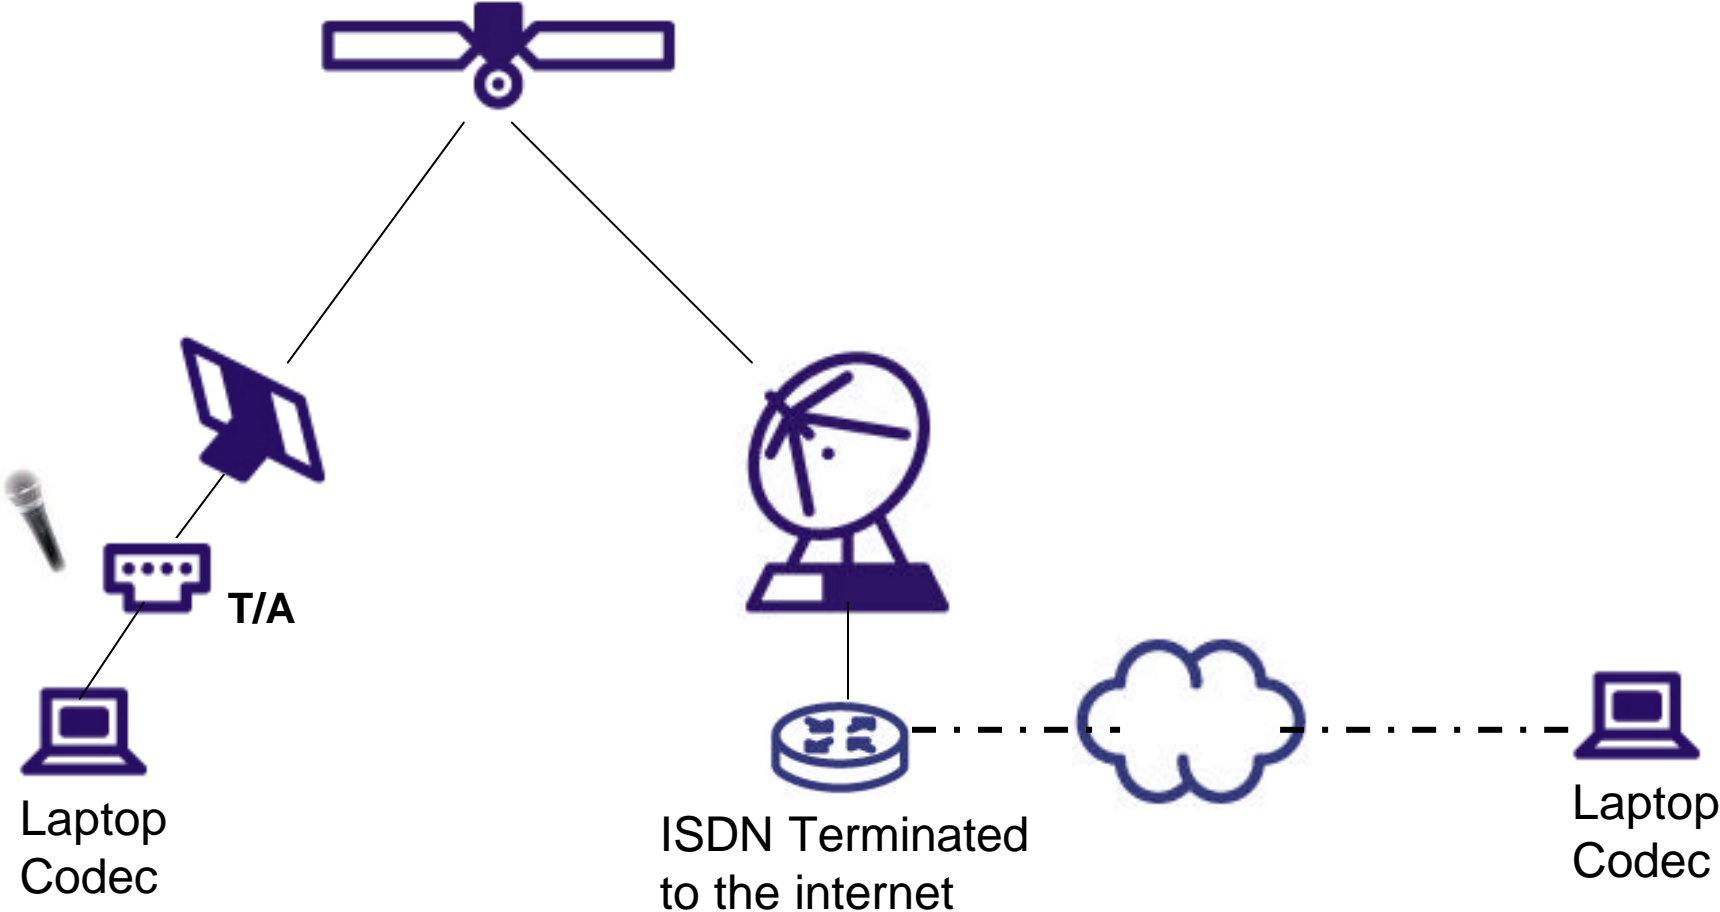

*MCI is in the process of moving all of its voice traffic to an all VoIP-backbone, playing off excess capacity from its dot.com run.*

*"The question is no longer if but when VoIP will become the new standard for voice traffic," says Cathy Martine, AT&T's senior vice president of Internet telephony.*
