

Inmarsat – BGAN HDR

Martin Turner

Director of Media Business, Inmarsat

WBU-ISOG, Rio de Janeiro

November 5, 2013

The HDR Difference

Not just another BGAN

..... the next step change in video newsgathering

The HDR Difference

- **Radical improvement in video quality**
- **Plug and play bonding**
- **Low end VSAT capability in BGAN form factor**
- **Guaranteeing cellular data solutions**

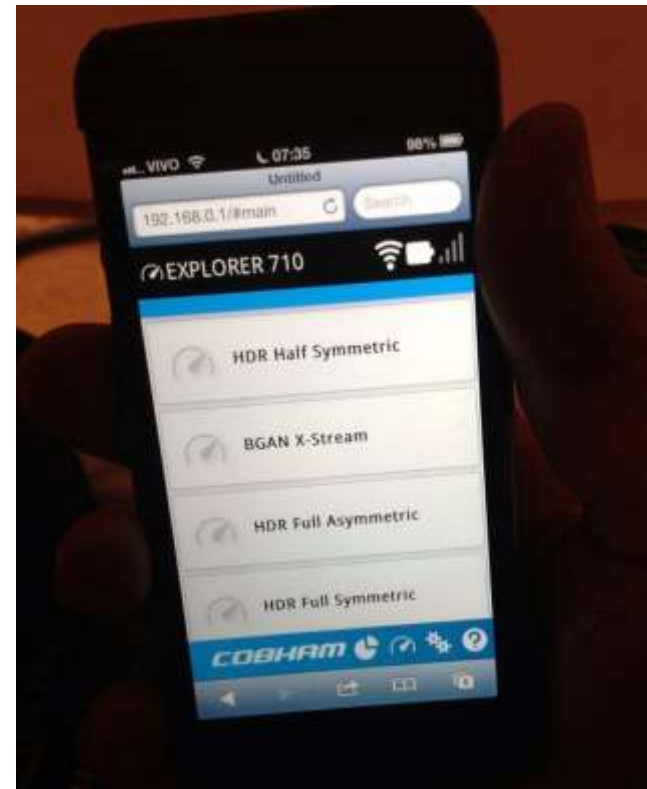

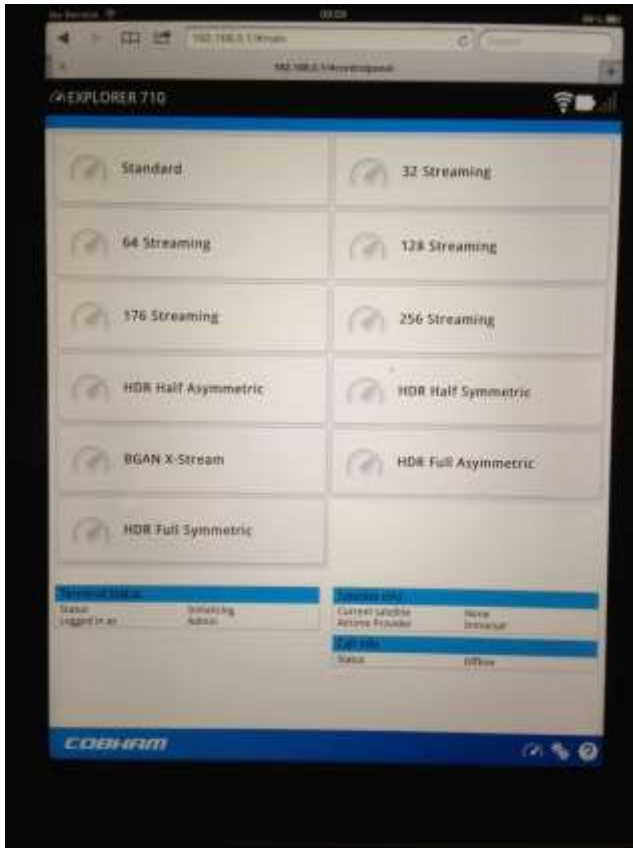

The HDR Difference

Connectivity made simple

- The on-air guarantee
- Giving journalists the time to gather news
- Reliability, flexibility, simplicity
- Control from any web-enabled device

Connectivity management

The screenshot shows a web browser window with the address bar displaying '192.168.0.1/#main'. The browser title is 'EXPLORER 710'. The main content area features a grid of service selection buttons, each with a circular icon and a text label. The buttons are arranged in two columns:

Standard	32 Streaming
64 Streaming	128 Streaming
176 Streaming	256 Streaming
HDR Half Asymmetric	HDR Half Symmetric
BGAN X-Stream	HDR Full Asymmetric
HDR Full Symmetric	

On the right side of the interface, there are three informational panels:

- Terminal status:**

Status	Initializing
Logged in as	Admin
- Satellite info:**

Current satellite	None
Airtime Provider	Inmarsat
- Call info:**

Status	Offline
--------	---------

The bottom of the interface features a blue footer bar with the 'COBHAM' logo on the left and three icons (refresh, settings, help) on the right.
